

LORI G. POLACEK, M.D., INC.
PLASTIC AND RECONSTRUCTIVE SURGEON

Dear Botox/Dysport Patient,

As a board certified plastic surgeon who specializes in cosmetic procedures, I have had the unique opportunity to use Botox Cosmetic since its availability in 2002. Dysport has been used in our practice since its availability in the U.S. in 2009. In the beginning its use was limited to the upper face: the forehead, crows feet and between the brows. Since that time we have come to know Botox/Dysport in a completely different and more versatile way and now use Botox/Dysport for other areas of the face.

With many new uses has come the understanding that each patients needs are unique and that Botox/Dysport doses must be carefully adjusted for every person in order to achieve the best result. For this reason we will no longer be charging for Botox/Dysport “by the area” and beginning with you next appointment we will begin charging “by the unit”

In most cases the price of treatment will remain about the same. In other cases the price may go down or up a little bit. We will continue to incorporate a small reduction in the fee per unit if more than one facial area is treated. If you would like to discuss this prior to your next visit please speak to Tammy or Pat.

Warm Regards,
Dr. Lori G. Polacek
